

Acme Corporation FY2025 Financial Report

1. Revenue & Income Summary

Acme Corporation achieved record financial performance in FY2025. Total gross revenue reached \$42.5 million, representing a 28% year-over-year growth compared to \$33.2 million in FY2024. Gross profit margin expanded to 68.2%, up from 62.4% in FY2024. Net profit margin reached 18.5%.

2. Operating Expenses & Vector Database Cost Optimization

Total operating expenses for FY2025 were \$24.1 million. Under managed Pinecone vector database pods, vector storage cost \$1,450 per month (\$17,400 annually). By transitioning to self-hosted Qdrant nodes in Docker on AWS Graviton, monthly compute costs dropped to \$140 per month. This architectural pivot achieved an annual cost reduction of \$120,000, representing a 91.4% cost savings.

3. Research & Development Investment

Research and Development expenditure for FY2025 was \$8.2 million, accounting for 19.3% of revenue, dedicated to low-cost vector search algorithms, BAAI/bge-small-en-v1.5 embeddings, and automated RAG evaluation.

4. Balance Sheet & Cash Flow Summary

4.1 Cash Position & Liquidity

Acme Corporation ended FY2025 with \$18.6 million in cash and cash equivalents and zero long-term debt. Current assets totaled \$24.8 million against current liabilities of \$5.2 million, resulting in a current ratio of 4.77x.

4.2 Operating Cash Flow & FY2026 Guidance

Net operating cash flow reached \$12.4 million in FY2025. Management projects FY2026 revenue guidance between \$52 million and \$56 million.
